-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group I in the reply filed on January 29, 2008 is acknowledged. The traversal is on the ground(s) that the Examiner has failed to show by appropriate explanation either separate classification, status in the art or different filed of search . This is not found persuasive because the groups have different status in the art as a production and a method and in separate classifications as illustrated in the election mailed January 17, 2007. The product claims include several intended use limitations that will be considered, but not give patentable weight which will result in a different search from the method claims.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a control for selecting one or several battery cells according to a residual voltage of each battery cell and a control signal of a terminal,

does not reasonably provide enablement for how the control charges the battery cell or power supply. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. The specification does not reasonably provide enablement for how the control charges the battery cell or power supply. It appears as though the battery cells are charged by being connected to a charge terminal of the interface unit (See page 9 of the instant specification). It is unclear as to how the controller performs charging of the battery cell.
